Art Unit: 2819

1. This application is in condition for allowance except for the following formal matters:

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figure 5 contains font size too small to read and Vcc not labeled as indicated in the specification. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach a seventh transistor coupled between a fourth node and the first node having a control electrode coupled to the third node, as recited in claims 1 and 14; and the cited prior arts also fail to teach a step of using a transistor to couple the supply voltage to the first node of the input buffer depending on the input signal to the input buffer and an output signal of the input buffer, as recited in method claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
